

User Setup of the Broadband Company Network (BCN)

Purpose

The purpose of this document is to explain how to connect to the new company wireless network. This automatic installation will upgrade from your corporate wireless network, CompanyNetwork. The process will eliminate the need for a third-party VPN client (Execustar) for network wireless connections.

This upgrade will begin, at the time in which you login after your scheduled deployment date.

*Please note: you will need to store your usernames and passwords associated with your wireless connection **IN ADVANCE!!!***

FOR WINDOWS USERS

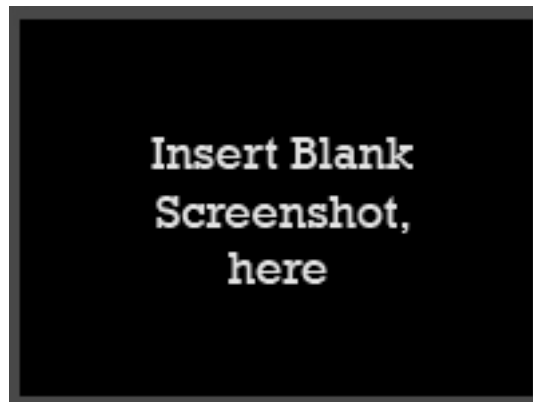

Directions

Follow these steps to walk through the process of establishing a connection with the new BCN, WIFI wireless network, via **Windows**.

Step 1

This process will begin as soon as you login to your machine after the scheduled date. The process will allow you to continue to work while it installs the new configuration to your machine.

You will see the following screen when the installation is complete.

Step 2

When the screen pops up, you will need to reboot your machine for the changes to take effect.

Step 3

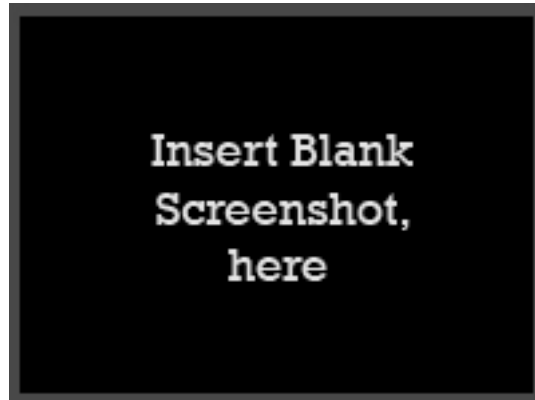

After rebooting, turn on your wireless. You will notice that if you had formerly used the company connection wizard in the past, it will be replaced with Windows to manage your connections(s) going forward.

Please note: You will need to recreate your home profiles on the new Windows system.

The company connection wizard will no longer be available for use.

Step 4

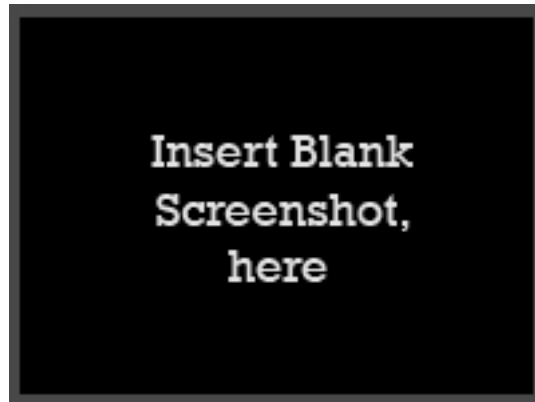

On connecting to the network BCN, a balloon pops next to the wireless-network connection icon in the task-tray.

Click on the **balloon** to enter your credentials.

Step 5

When the window pops up, enter your **user name** and **password** (your pin number, followed by the code currently displayed on your token).

Step 6

To enter the network, *Leave logon domain blank!*

Step 7

You are now connected to the BCN network. You will be able to get to the intranet without having to connect through Execustar VPN, any longer.

Windows Users please note: These instructions correspond with the BCN network. In the event that the BCN profile is deleted, or Windows is having issues connecting to an existing BCN profile, you should go into Network Communications and make sure the settings are entered as described below.

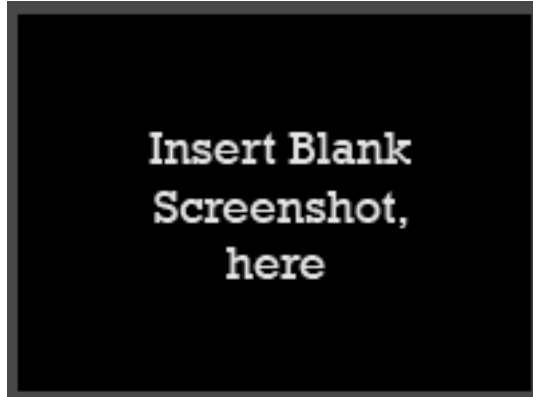

FOR MAC USERS

Directions

Follow these steps to walk through the process of establishing a connection with the new BCN wireless network, via the **Mac OS**.

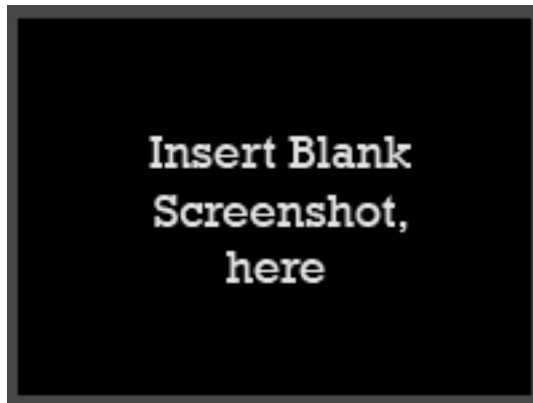

Step 1

Turn your airport ON and connect to BCN

Step 2

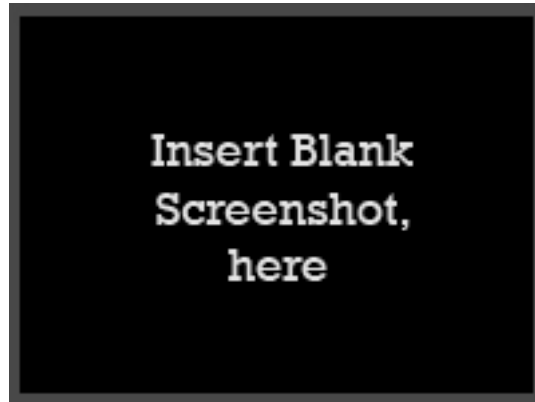

Enter your company **User ID** and **Password**.

*Please note: ** Do not check "Remember password in my keychain" ***

Step 3

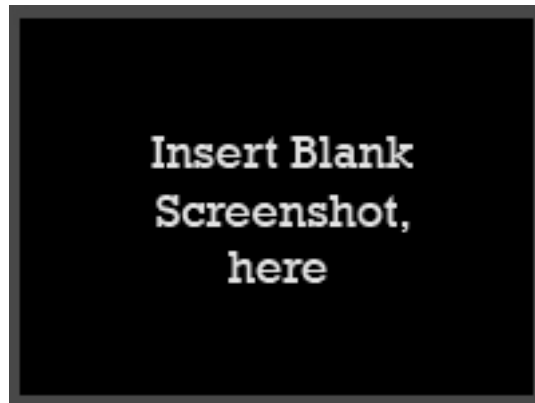

You will then receive a message that says the certificate is not trusted.

Click on **Show Certificate**.

Step 4

Verify this certificate when you check **Always Trust** “**Check always trust** **“securelogin.Execustarnetworks.com”**”

Click **Continue**.

Step 5

YAY! You have now set-up an automatic connection and will no longer have to use Execustar VPN!
